

PROJECT DEMO PLANNING

FitBuddy – AI Fitness Plan Generation Using Gemini Models

Date	30/09/2026
Team ID	SWTID-2026-7387
Project Name	FitBuddy – AI Fitness Plan Generation Using Gemini Models

Project Demo Planning

Suggested 12-minute presentation covering the problem, Gemini-based solution, live demonstration, and Q&A.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce FitBuddy and explain the difficulty of creating a fitness plan suited to individual goals and preferences.	1	Team Leader / Presenter
2	Solution Overview	Explain how the application uses Gemini models to generate personalized fitness-plan suggestions from user-provided information.	2	AI / Backend Developer
3	User Profile & Goal Input	Show how a user enters fitness goals, fitness level, preferences, and any other fields supported by the application.	2	Frontend Developer
4	AI Fitness Plan Generation	Demonstrate submitting the inputs and displaying the fitness plan generated by the Gemini model.	3	AI / Backend Developer
5	Feature Walkthrough & Safety	Highlight the available features and explain that generated plans are general guidance and should be adapted to individual needs.	2	Frontend Developer
6	Conclusion & Q&A;	Summarize the project, mention possible future enhancements, and answer questions from the audience.	2	Team Leader / All Members

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the team, project title, target problem, and purpose of FitBuddy.
2	Solution Overview	Describe the user-input workflow and how Gemini models help generate a fitness plan.
3	Live Feature Demonstration	Enter sample details, generate a plan, and explain the resulting recommendations using the working application.
4	Q&A; Session	Answer questions about features, technology, limitations, and future improvements.

Preparation Checklist

- Open the application and verify that the main screens load correctly.
- Check the Gemini model/API connection and internet access before the demo.
- Prepare sample fitness goals and user details for a smooth live demonstration.
- Test the complete input-to-generated-plan flow before presenting.
- Do not show API keys, passwords, or other confidential information on screen.
- Replace role-based placeholders with actual team-member names if required by your institution.

Important Note

The project demo date has been updated to 30/09/2026. Team-member names were not provided, so role-based labels are used and can be replaced with actual names.
