

Scalability & Future Plan

Date	30/09/2026
Team ID	SWTID-2026-7387
Project Name	FitBuddy
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited user capacity	System may slow down as the number of users increases.	High
2	Basic data storage	Large amounts of fitness data may require more storage capacity.	Medium
3	Limited feature integration	Adding new AI, nutrition and tracking features may require upgrades.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Limited users	Use cloud deployment and auto-scaling to support more users.
2	Data Storage	Local/basic database	Use a scalable cloud database with backup and recovery.
3	Performance	Basic processing	Optimize APIs, add caching and load balancing.
4	Security	Basic authentication	Add secure authentication, encryption and role-based access.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Progress tracking & analytics	Next release	Improved monitoring of user progress
Phase 3	Nutrition & wearable integration	Future release	More complete fitness support
Phase 4	Cloud scaling & advanced AI	Long-term	Support a larger user base
