

Coding & Solution

Date	30.09.2026
Team ID	SWTID-2026-7387
Project Name	FitBuddy
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	GitHub repository: To be added
Programming Language(s)	HTML, CSS, JavaScript
Framework(s) Used	None (Vanilla JavaScript)
Key Features Implemented	Workout planning; fitness tracking; progress monitoring; user-friendly dashboard.
Pending / Incomplete Features	Backend integration, authentication, cloud deployment and advanced notifications.
Setup / Run Instructions	Open the project in VS Code, install required dependencies if any, then run the application using a local browser/server.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

FitBuddy code is planned to follow modular and readable coding practices. The project focuses on core fitness features and can be extended with backend services, authentication, deployment, and notifications as development progresses.
