Team ID	SWTID-2026-7387
Project Name	FitBuddy
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	GitHub repository link to be added
Programming Language(s)	HTML, CSS, JavaScript
Framework(s) Used	Responsive Web UI; JavaScript
Key Features Implemented	User registration/login, fitness profile, workout plans, exercise tracking, BMI/calorie guidance, progress tracking
Pending / Incomplete Features	Backend integration, cloud deployment, notifications, and advanced analytics
Setup / Run Instructions	

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

FitBuddy is designed as a user-friendly fitness support application. The solution focuses on workout planning, exercise tracking, fitness progress, and basic health guidance. Code is organized for readability, reuse, and future feature integration.
