

Project Initialization and Planning Phase

Date	30/09/2026
Team ID	SWTID-2026-7387
Project Title	FitBuddy
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

FitBuddy is a smart fitness and wellness application designed to help users maintain consistent healthy routines. It brings workout planning, nutrition guidance, progress tracking, and reminders into one easy-to-use platform.

Project Overview	
Objective	The primary objective is to provide users with personalized fitness guidance, helping them plan workouts, follow healthy routines, and monitor progress.
Scope	The project covers user profiles, personalized workout plans, nutrition guidance, activity tracking, progress monitoring, and reminders within a single fitness platform.
Problem Statement	
Description	Many users struggle to maintain regular exercise and healthy eating because they lack personalized plans, simple progress tracking, and timely reminders.
Impact	Addressing these challenges can improve routine consistency, make progress easier to understand, and support users in following their fitness and wellness goals.
Proposed Solution	
Approach	Developing a user-friendly fitness platform that combines personalized workout recommendations, nutrition guidance, progress tracking, and reminders to support consistent healthy habits.

- Goal-based reminders and notifications
- User-friendly dashboard for fitness progress

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Development and testing device	Laptop/Desktop with 8 GB RAM or higher
Memory	RAM for application development and testing	8 GB RAM
Storage	Space for source code, database, assets and logs	256 GB SSD or higher
Software		
Frameworks	Application framework	Flask / HTML / CSS / JavaScript
Libraries	Supporting libraries	pandas, numpy, matplotlib
Development Environment	IDE / tools	VS Code, Jupyter Notebook
Data		
Data	Source, size, format	User profile, workout, nutrition and progress data; CSV/SQLite format
