Maximum Marks	3 Marks

Define Problem Statements

Create a problem statement to understand the customer's point of view. The FitBuddy problem statements focus on common difficulties in maintaining regular exercise, healthy habits, progress tracking, and motivation. The statements are written from the customer's perspective so that the team can design a useful and user-friendly fitness companion.

Problem Statement	I am (Customer)	I'm trying to	But / Because	Which makes me feel
PS-1	A busy student or working professional who wants to stay fit.	Maintain a regular workout and healthy routine.	I have limited time, an inconsistent schedule, and difficulty choosing suitable exercises.	Unmotivated and worried that I am not making progress.
PS-2	A beginner starting a fitness journey.	Follow exercises that match my fitness level and goals.	I am unsure which exercises, duration, and intensity are appropriate for me.	Confused and less confident about exercising correctly.
PS-3	A fitness user trying to improve consistently.	Track workouts, habits, and progress in one place.	My activity information is scattered across different apps or notes, making progress difficult to monitor.	Frustrated and unable to clearly see my improvement.
PS-4	A user who needs motivation to continue exercising.	Stay consistent with my fitness goals.	I lose motivation when I do not receive timely reminders, encouragement, or visible progress feedback.	Demotivated and likely to stop following my routine.

Consolidated Customer Problem Statement

FitBuddy users need a simple and personalized way to plan suitable workouts, track fitness activities and progress, and receive motivation and reminders because busy schedules, uncertainty about exercises, and fragmented tracking make it difficult to maintain a consistent fitness routine.

Key Customer Needs

1. Personalized workout guidance based on goals and fitness level.
2. Simple workout and habit tracking in one place.
3. Clear progress information that is easy to understand.
4. Reminders and motivational feedback to support consistency.
5. A beginner-friendly, accessible, and easy-to-use interface.

Project Focus

FitBuddy is planned as a digital fitness companion that helps users build sustainable fitness habits through personalized workouts, progress tracking, reminders, and motivation. The solution should prioritize simplicity, consistency, and user engagement.
